DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2,4,6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Arai (U.S. patent No. 5,517,551).

As to claim 1, Arai discloses a private branch exchange (101) system (figure 1) comprising: a plurality of mobile stations (109 to 114) each having a plurality of extension numbers (103 to 105) and each extension number having a different line key (118) set for said plurality of extension numbers respectively (column 2, lines 31-46, column 4, lines 11-24 and figure 1,4 and 5A-C, 7-8).

Arai discloses a base station (fixed units) wirelessly connected to the plurality of mobile stations (109-114), (figure 1).

Arai discloses an exchange station (102) for performing call control of the plurality of mobile stations through the base station (column 2, lines 31-46 and figures 1,11)

As to claim 2, Arai discloses at least one of said plurality of extension numbers set for the plurality of mobile stations is a unique extension number for each of the plurality mobile stations (column 6, lines 15-25).

As to claim 4, Arai discloses all limitations as explained in claim 1, further more, Arai discloses the plurality of mobile stations has the same extension number as that of one predetermined other mobile stations (column 6, lines 15-25).

As to claim 6, Arai discloses a plurality of mobile stations (109 to 114) each having a plurality of extension numbers (103 to 105) and each extension number having a different line key (118) set for said plurality of extension numbers respectively (column 2, lines 31-46, column 4, lines 11-24 and figure 1, 4 and 5A-C, 7-8).

As to claims 7-11, Arai discloses the plurality of mobile stations each have line buttons for setting the plurality of lines (316) (depressing speech button (S751) (figures 5A-C, 6 and 13).

Allowable Subject Matter

3. Claims 12-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does teach the call control section performs call control of the plurality of mobile sections based on the direction sent from the line state control section. This limitation in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Response to Arguments

4. Applicant's arguments with respect to claims 1-2,4,6-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suzuki et al (5,978,667) discloses PBX and plurality of extensions and mobile stations and private and public extension are interfacing to each other mechanism (figure 1).

Schumacher et al (5,841,854) discloses plurality of extension numbers and mobile stations are interfacing to each other (figure 1).

Mitsuo discloses PBX including extension numbers and mobile stations are interfacing each other , (abstract and figure 1).
